DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II (claims 39-59, 64-84, 89-107, 112-133, and 138-159) in Paper No. 9 is acknowledged.

In the response received on October 22, 2002 (Paper No. 9), Applicants, though stating that the election of species was being made without traverse, did not specifically recite which of the species was to be examined. During a telephonic conversation with Ms. Sandra Wells on November 1, 2002, Ms. Wells elected to have the species i) and sub-species ia) examined. The corresponding claims to the elected species and sub-species are claims 39-58.

Therefore, Claims 38, 59-173 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1637

Claims 39-58 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 39 and the dependent claims 40-58 are indefinite for the recitation of the phrase, "amplifying at least some of said fragments," because it is unclear whether the "said fragments" being amplified are fragments produced from the fragmentation of the first nucleic acid or the fragmented nucleic acids to which an adaptor sequences have been ligated. For the purpose of prosecution, the claims have been assumed to read on the latter interpretation. Amending the independent claim 39 to recite, "amplifying at least some of said fragments ligated with said adaptor sequences," would overcome this rejection.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer **cannot** overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 39-58 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-8, 11-15, and 18-24 of prior U.S. Patent No. 6,361,947 B1. This is a double patenting rejection.

The claims are verbatim as illustrated below:

Art Unit: 1637

Instant Application	6,361,947 B1
Claims 39-46	Claims 1-8
Claims 47-51	Claims 11-15
Claims 52-58	Claims 18-24

Conclusion

No claims are allowed.
